Visual style and taste guide

The Bible Dept and ARMA

Use this guide to make another project feel like it belongs to the same family: clear teaching, strong type, warm human imagery, and an obvious next step.

BIBLE DEPT REFERENCE IMAGERY

Default direction: Bible Dept for daily reading and related products. Use ARMA as the editorial direction for courses and campaigns.

Based on the public sites inspected October 18, 2026. Source imagery is shown as design reference. Proposed examples are labeled; this is a working guide rather than an official brand manual.

How the family fits together

Choose a primary identity before choosing fonts, buttons, or decorative details.

Bible Dept	ARMA
Daily reading and steady participation	Course learning and editorial campaigns
Bold grotesk headings and crisp controls	Condensed display with selected italic words
Orange, deep ink, warm paper	Red-orange, charcoal, warmer neutral light
Personal portraits and manuscript texture	Historical imagery and dramatic monochrome

Shared judgment

Teach with clarity

State one useful promise. Explain the help available. Give the reader a specific next action.

Let typography lead

Use a dominant title and purposeful line breaks. Let images support the same message.

Make expertise feel human

Use real people and ordinary language. Encourage a return after a missed day without shame.

Decision order: reading comfort and task clarity first, then brand recognition, then visual novelty. Keep the two brands related without combining every visual device into one screen.

Color by role

Use the vivid brand accent for identity and the darker action shade for small white labels.

BIBLE DEPT SOURCE COLORS

Orange	Ink	Paper	White
#F05A00	#0A0A09	#FFF5F5	#FFFFFF

ARMA SOURCE COLORS

Red orange	Charcoal	Warm light	Text light
#FC4615	#151515	#E6E7DA	#EEEFE8

EXISTING MOBILE APP ADAPTATIONS

Action	Muted	Tint	Border
#B74300	#74675F	#FFE7D9	#E9DBD3

Accent: recognition and decoration. **Action:** usable controls. **Ink and paper:** sustained reading. **Border:** quiet surface separation; the pale app border is not sufficient by itself to identify an input.

ARMA also declares #FE8408 as a supporting orange. Do not introduce it into Bible Dept screens as a second competing accent. Use a semantic error or success role only when the task requires it.

Readable color combinations

Color roles can stay recognizable while their text pairings improve.

Read with confidence

Ink on paper

18.52:1

Main reading pair

Read with confidence

White on action

5.50:1

Normal control labels

Read with confidence

Ink on orange

5.82:1

Text on a solid accent field

Pairing	Ratio	Decision
White on brand orange	3.40:1	Use only for qualifying large text
Action on paper	5.14:1	Suitable for normal text links
App border on white	1.35:1	Decorative separation only

Aim for 4.5:1 for normal text and 3:1 for large text. Large text means at least 24 CSS px regular or about 18.67 CSS px bold. Relevant control boundaries need 3:1 against adjacent colors.

Calculated solid sRGB pairs. Check actual image and texture backgrounds separately. WCAG source links appear on the final page.

Typography and hierarchy

Keep the type roles distinct. The visual samples below use labeled fallback families.

BIBLE DEPT / ARIAL BOLD SHOWN AS FALLBACK

READ. UNDERSTAND. KEEP GROWING.

Source: Neue Haas Grotesk Display. Home hero 56px / 1, weight 700, uppercase.

ARMA / IMPACT AND TIMES ITALIC SHOWN AS FALLBACKS

LEARN THE BIBLE

for yourself

Source: Headline Gothic ATF with Big Caslon FB italic. Actual home hero 112px / 1. Use the italic treatment for selected words, not whole paragraphs.

Role	Bible Dept desktop	Tablet	Small screen
Generic H1	56px / 1.2	52px	40px
Generic H2	48px / 1.2	44px	36px
Generic H3	40px / 1.2	36px	32px
Medium body	18px / 1.5	18px	16px

ARMA generic H1 is 80px; its home hero overrides that value. Body is shared grotesk: Bible Dept base weight 400, ARMA 500. Bible Dept script utility is optional and is not needed for the home hero. Use licensed fonts in production; recheck wrapping after substitution.

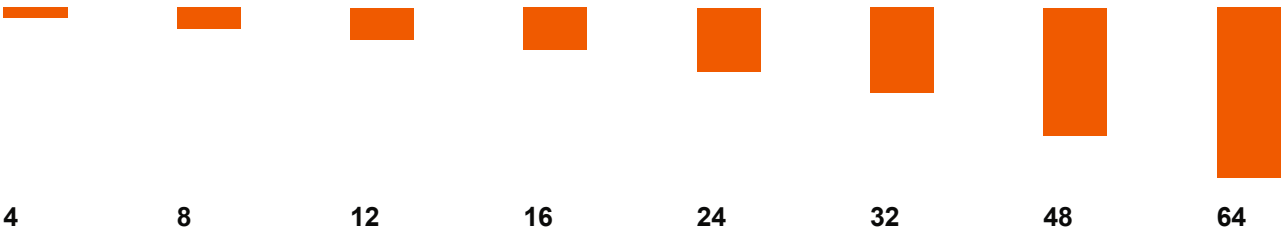

Space and layout

Keep full-width backgrounds separate from the aligned content inside them.

SHARED DESKTOP STRUCTURE / SCHEMATIC

RECOMMENDED INTERNAL SPACING STEPS

Relationship	Starting recommendation
Heading to paragraph	16-24px
Paragraph to actions	24-32px
Desktop column gap	48-80px
App side inset	20 platform units
Large section top and bottom	112px desktop / 96px tablet / 64px small

The 5% gutters, 80rem maximum, and large section padding are extracted source values. The internal steps and app spacing are normalized recommendations. Do not shrink type to keep a desktop composition on a phone.

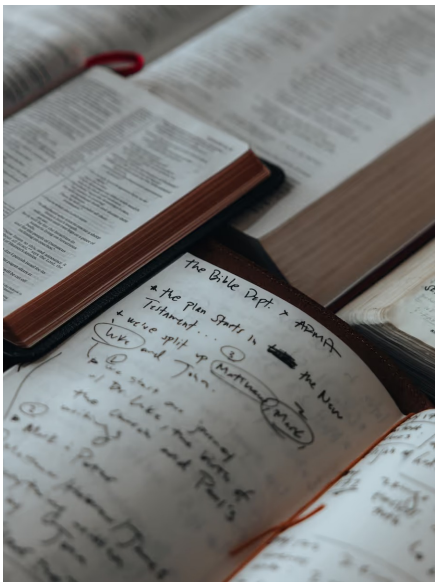

Logos and imagery

Use people, teaching context, and texture with a clear purpose.

Human presence

Bible Dept

Study context

Bible Dept

Historical drama

ARMA

Use the approved logo artwork without retyping, stretching, or recoloring it casually. Preserve breathing room; half the mark height is a starting clear-space recommendation until official specifications are available.

Keep portraits warm and natural. Crop by subject, not by stretching. Use manuscript texture for selected brand moments and keep long reading surfaces plain. Starting ratios for new assets: 4:5 portraits and 16:9 teaching media.

Source assets are embedded for reference. Keep an original and optimized production derivatives; record destination reuse approval and any required attribution. Add meaningful alt text and use empty alt text for decorative texture.

Hero and navigation

Illustrative reconstruction with source imagery and original sample copy. This is not a site screenshot.

THE COMPOSITION

One promise

A short title and explanation establish the actual outcome. Keep critical words in live text.

One dominant action

Pair a filled action with a quieter alternative only when it helps a different readiness level.

One coherent image choice

The portrait and text should support the same invitation. Control crop and background contrast.

Navigation: an approved mark, a few clear destinations, a current-page cue, and a primary action. On a phone, use a named menu control with expanded state and predictable focus return.

Page patterns and responsiveness

Preserve the page logic while changing the arrangement to fit the available space.

05 Optional community

06 Resume clearly

Desktop to phone

Bible Dept hero becomes one column at the 991px tier. Keep useful reading order, allow actions to stack, and let heights grow with content. Source media queries also include 767px and 479px tiers.

At 390px, the public home hero puts text/actions before its portrait. The Plan page stacks its form action and uses a 36px title, because that H1 has an H2 visual style.

Buttons links and states

Choose hierarchy first. Preserve readability through every state.

STATE SPECIMENS

Save prayer

Default

Save prayer

Pressed

Save prayer

Disabled

Saving...

Busy state; prevent duplicate writes

Keyboard focus

Visible focus on light and dark

Geometry	Bible Dept	ARMA
Source radius	4px	10px
Source padding	12px vertical / 24px horizontal	12px vertical / 24px horizontal
Source button weight	600	500
Product control height	Existing app minimum 50 units	Adapt to the destination

Use links for destinations and buttons for actions. Give icon-only controls a name and a generous hit area. Hover and pressed styles should be subtle; essential information must remain available without hover.

Fields and status messages

A visible label remains after entry. Feedback belongs close to the task.

Email address

you@example.com

Helper text explains the purpose, not an internal implementation detail.

Send the plan

ERROR AND RECOVERY SPECIMEN

Email address

you@

Enter a complete email address.

State	The message should do this
Validation	Name what needs correction; connect the message to the field.
Network failure	Keep the draft and offer one useful retry action.
Success	Confirm the completed action only after it succeeds.
Loading	Announce progress and prevent duplicate submission.

Use autofill hints and the correct input mode. Avoid placeholder-only labels, tiny disclosure text, or loss of user input. Request only the information required by the real flow; do not copy an email gate by default.

Teaching cards process and proof

Give content a clear title, consistent metadata, and an honest destination.

COURSE ARTWORK / SOURCE REFERENCE

Category / Lesson count

A clear teaching title

A concise description explains what someone will understand or learn.

Open course

PROCESS PATTERN

1 **Read daily**

A manageable next passage.

2 **Listen and understand**

Teaching that explains the context.

3 **Grow together**

A clear route to real community.

Evidence and interaction

Testimonials

Use an approved quote, attribution, and relationship to the program. Never invent a subscriber count or endorsement.

Carousels and tabs

Provide visible controls, keyboard operation, selected-state semantics, and access to every item. Prefer a simple grid or stacked steps when that is clearer.

Course illustration uses an original ARMA thumbnail. The surrounding title and action are illustrative. Verify actual course counts, prices, access details, and offers rather than copying dated homepage numbers.

Questions and supporting navigation

A calm answer often helps more than another promotional card.

Common questions

What happens if I miss a day? -

Welcome back. Begin again with today's passage, or return to your saved place.

What do I need to begin? +

Where can I find the next chapter? +

Use native disclosures or correctly named controls with expanded state. Enter and Space toggle the question. Answers remain selectable and any links remain usable.

FOOTER SPECIMEN

THE BIBLE DEPT

Plan Listen Courses

Official platforms

Podcast Video Social

Group essential links quietly. Use approved destinations, readable link cues, and useful accessible names. Avoid adding a decorative countdown or obsolete campaign detail to an everyday product.

Daily product and reading

A compact brand moment can welcome someone in. The passage then needs a quiet surface.

PROPOSED TODAY SCREEN

YOUR NEXT CHAPTER

Make room for today.

Continue reading

Grow with intention

A quiet progress summary and a small number of useful supporting items.

PROPOSED READING SURFACE

Book and chapter

Translation

Comfortable reading begins with enough room for the words. Keep the type open, the leading generous, and the background calm.

Previous Next chapter

Role	Recommended product starting point
Screen title	28-32 platform units
Section / body	20-24 / 16-18 units
Scripture	18-20 units with 1.5-1.7 line-height ratio
Control label / metadata	15-16 / 13-14 units

Original example text, not Scripture or a report of a new app implementation. Support text-size adjustment, safe areas, wrapping, and retained reading position. Keep promotions, texture, and decorative animation out of the passage.

Progress prayer and account

Make the condition clear and the next step useful. Describe actual storage accurately.

Plan states

01
Completed

02
Current

03
Selected

Use a label or icon as well as color. Separate the selected day from the current plan position and completed days. Make direct jump and return-to-current actions obvious.

Prayer journal

Empty: A place to bring what's on your heart. Write your first prayer when you're ready.

Saved: Your prayer is saved.

Failed save: We couldn't save this prayer. Your draft is still here. Try again.

Account and persistence

State signed-in status first, then account tasks. Keep validation adjacent to the field and support password managers. Explain device-only plan position separately from account-backed reading completion or prayer records.

Use confirmation text only after a successful operation. Keep private journals distinct from community sharing. The active app is free; course-marketing patterns do not establish checkout, subscriptions, or offline-download features.

Voice and content

Direct, warm, confident, and patient. Help someone understand what they can do next.

Moment	Original sample wording
Welcome	Make room for today's reading.
Resume	Open the next chapter and take it one passage at a time.
Missed day	Welcome back. You can begin again with today's passage.
Reading failure	We couldn't load this chapter. Check your connection and try again.
Local plan position	Your place in the plan is saved on this device.
Completion	Today's reading is marked complete.

Writing rules

Name the task

Use concrete verbs and specific destinations. Explain unfamiliar terms before relying on them.

Encourage without pressure

Avoid guilt, invented urgency, exaggerated outcomes, or language that judges someone's spiritual life.

Naming: The Bible Dept. in public-brand prose, BibleDept for the app, ARMA for courses, and Dr. Manny Arango when formally naming the host. Use sentence case for product instructions. Never rewrite a Bible translation to match brand voice.

Examples are newly written product copy, not quotations or attributed teaching. Keep Scripture, interpretation, personal testimony, and product instructions distinct. Verify claims, permissions, prices, and testimonials.

Interaction and accessibility

A style is complete only when the difficult states are understandable too.

RECOMMENDED TIMING / NO MOTION REQUIRED TO UNDERSTAND THE TASK

Keep content available

Do not hide essential text behind a scroll reveal. Provide a usable still image if motion or video fails.

Support the input method

Expose name, role, state, keyboard order, visible focus, and native equivalents. Do not rely on hover or swipe alone.

Respect user preferences

Support reduced motion and enlarged text. Let controls grow rather than clipping labels.

Make teaching media usable

Provide manual playback, visible controls, captions or transcripts, and a stable layout before media loads.

Condition	Useful response
Passage request fails	Preserve place and offer retry.
Image fails	Keep the title, explanation, and next action usable.
Person misses a day	Welcome them back and show where to begin.

Implementation and review

Start with the existing theme and shared controls rather than a second palette inside each screen.

Existing file	Responsibility
palette.ts	Source brand constants in the retained native app
theme.ts	Active mobile semantic colors
ui.tsx	Shared action button, field, and notice
Home / Bible / Plan screens	Daily task, passage, and plan position
Prayer / Account screens	Private writing and account recovery

Review before release

- ☐ The primary task and next action are clear.
- ☐ One brand direction governs type, color, shape, and imagery.
- ☐ Real content and approved assets replace specimens.
- ☐ Text and control states remain readable on actual backgrounds.
- ☐ Keyboard, focus, labels, expanded state, and large text work.
- ☐ Reading is calm; saved position and private records are described accurately.
- ☐ Loading, failure, empty, and success states preserve a route forward.

Web: map semantic roles to CSS variables. Native: use platform units, accessible props, and safe areas. Licensed fonts and final imagery still need destination verification. This guide does not change runtime app behavior.

Sources and quick specification

A dated visual guide for related work, with source facts kept separate from proposed patterns.

Bible Dept default	Value
Brand / action	Orange #F05A00 / existing app action #B74300
Reading pair	Ink #0A0A09 / paper #FFF5F5
Controls	4px source radius / existing app minimum height 50 units
Shared web structure	5% gutters / 80rem maximum / section padding 7, 6, 4rem
Headline direction	Bold grotesk; use licensed Neue Haas Grotesk Display
Visual priorities	Human imagery, strong hierarchy, clear next action

Plan

Listen

Repository guide, tokens, source evidence, and asset inventory

WCAG text contrast / WCAG non-text contrast

Evidence key: observed = visible browser result; extracted = source CSS declaration; existing app = implemented repository value; proposed = a recommendation or original specimen. Similar Webflow structure does not establish shared developer authorship.

Source imagery remains reference material. The font specimens use Arial, Impact, and Times Italic as labeled substitutes. This PDF collects all visual domains from the multipart guide; machine-readable declarations and asset provenance remain in the linked repository.
